Council and Executive Committee of the IFHE

Present

It is an honor to submit and extend my strongest recommendation on behalf of **Arch. Briseyda Reséndiz Márquez** to join the Executive Committee (ExCo) of the *International Federation of Healthcare Engineering* (IFHE). As a current member of its Board of Directors, Arch. Reséndiz not only fully embodies the federation's values of excellence and global vision, but her remarkable career in the planning, design, and management of healthcare infrastructure also makes her the ideal candidate to contribute to our organization's strategic growth.

Over nearly two decades, Arch. Reséndiz has consolidated an extraordinary professional profile that perfectly balances technical practice, institutional leadership, and international academia:

- **Institutional Leadership and Public Policy:** Her outstanding tenure as President of the Mexican Society of Architects Specialized in Healthcare (SMAES) from 2020 to 2023, alongside her role as Technical Coordinator of Infrastructure Projects within the Mexican Social Security Institute (IMSS) until August 2025, demonstrates her capability to lead large-scale projects and coordinate complex agendas.
- **International Representation:** Her active involvement as the representative of the Federation of Colleges of Architects of the Mexican Republic in the Public Health Group of the International Union of Architects (UIA) since 2023 confirms her deep understanding of global challenges in designing safe clinical environments.
- **Academic and Scientific Contribution:** As the chairholder of Selected Topics in Planning and Design of Healthcare Facilities at the postgraduate level of the National Autonomous University of Mexico (UNAM), she remains at the forefront of scientific and technological innovation, fostering the development of upcoming generations through a cutting-edge approach.

Key Contributions to the Executive Committee (ExCo):

If elected to the Executive Committee, I am fully convinced that Arch. Reséndiz Márquez will bring invaluable assets to the federation in the following areas:

1. **Strengthening Global and Regional Cooperation:** In complete alignment with Standing Order **SO.001.03**, which promotes representation from the diverse regions of the world within the ExCo, her presence will significantly bolster the leadership and perspective of the Latin American region in global decision-making.
2. **Innovation in the "Hospital of the Future" Agenda:** Having successfully chaired the international congress "Hospital of the Future", Briseyda possesses a clear, structured, and actionable vision regarding the resilience and technological transformation required by modern hospital engineering and architecture.
3. **Management Capacity and Consensus Building:** Her experience as a director in the private sector and her impeccable track record in managing institutional investment portfolios guarantee that she will execute any duties allocated by the ExCo with absolute efficiency, transparency, and structure.

Arch. Briseyda Reséndiz Márquez possesses the endorsements, qualifications, and ethical and professional commitment required to enrich the mission of the IFHE.

Thank you in advance for considering this nomination toward the continuous advancement and well-being of global healthcare engineering. I remain at your full disposal.

With Regards,

Ramiro Ortiz Treviño

President
